LarRy White Ppaer

Initial Token Distribution

LarrY is an economic powerhouse built on the Binance Smart Chain, where we are developi

ng an innovative suite of DeFi products. Each holder frictionlessly receives rewards in LarrY, withdrawable in all the top BEP20 tokens of that communities votes to be added. You don't have to stake or farm.

A true community-driven DeFi Token with an innovative reflections functionality and a focuson continuous, sustainable growth.
Our main objective is to offer as much value and utility toour users as possible.

Our initial launch goal is to provide passive income to our holders, but that's only the first step.

We aim to build an LarrY ecosystem with many exciting features planned for the near future. Some examples include governance mechanisms that will enable you to have a say inth

Behind the Scenes

The contract keeps track of an array composed of all token holders.
The contract keeps an index into the array for processing.

The token is based on a dividends and payment protocol which means all rewards the contract gainswill be split equally to the token holders dependent on the amount they hold.

This system is fully automated The number of holders processed through each transaction is dynamicand based on transaction size. Holders will receive dividends from the queue based on their positionin the array.

LarrY Redistribution

system that allows holders to view the amount due and to withdraw to multiple BEP20 tokens of theirchoosing.

The way it works for holders you buy tokens and HOLD them, the contract will keep track of the rewards owed to your wallet. The holder can then access our unique user interface to withdraw rewards inmultiple bep20 tokens

FAQ

What is the purpose of LarrY?
Passive income with portfolio building features

● **How do I buy LarrY?**
You can buy LarrYon Pancakeswap.finance or global exchange

If there is a problem with the transaction,
try to use round numbers without decimals or restart your browser

● **Will my rewards always be paid daily?**
Our unique reward system is triggered by volume (buy + sell activity to cover gas fees) and payouts to holders are expected to occur as frequently as every 60 minutes, but might take longer if trading volume is low.

When this is the case, the amount of rewards each holder will receive does not decrease and will accrue over a longer period of time until it is suitable for a payout to trigger (usually a few hours)

● **Why can't I see my rewards?**
It takes some time for rewards to come through, particularly if you have a small number of tokens and trading volume is low.
